Board Name	CBSE
Medium	English
Year of Passing	2019
Percentage	76%

PROJECTS

Ayuwell- Health management APP, November 2025 - January 2026

- A Health Management Application was developed to provide an integrated digital healthcare experience, enabling users to book online consultations, purchase medicines, and track vital health parameters. The app also includes an AI-based personalized diet planner, a chatbot for general queries, and a yoga trainer module for fitness support. It was built using Flutter, Android Studio, and Firebase for backend services.

Resume Selector-using genai, June 2025 - June 2025

- A resume screening system was developed using Python, leveraging the DeepSeek model and LangChain to rank the best-fit candidates from a pool of submitted resumes. The application includes two main input fields—one for the job description and another for uploading multiple resumes in PDF format—and processes them to identify and rank candidates based on relevance and suitability.

HackAndShield- A cyber security learning app, January 2025 - April 2025

- I have done this project as my 6th semester mini project , it is basically an Application for Android Phone where user can learn about the potential cyber Threats and crimes and how to tackle those situation , the learning are gamified to make it more interesting and engaging to the user and the user can learn by video courses and there are tests to check their progress also real life threat scenario to train them how to react in particular cyber threats

Blog writing website, January 2024 - February 2024

- During the 4th semester, a full-stack blogging web application was developed as a final project using the MERN stack. The platform allows users to sign up and log in, create and publish blogs, as well as read and like posts shared by other users, providing an interactive and dynamic user experience.

Tourist website, August 2023 - September 2023

- A frontend web project was developed during the 3rd semester using HTML, CSS, and JavaScript, showcasing a travel and booking platform interface. The application features multiple sections including Home, Hotel Booking, Packages, and Ticket Booking, providing a structured and user-friendly layout for navigation and interaction.
